Lecture on Digital Literacy

In today's fast-paced world, digital literacy is not just a skill but a necessity — especially for women, who are pivotal in shaping families, communities, and economies. Prof. Sachinjeet Singh, in his insightful lecture, emphasized the transformative power of digital knowledge for women's empowerment and societal progress. He highlighted that digital literacy equips women with the ability to access information, enhance education, and participate in economic activities. Whether it's managing finances through online banking, accessing healthcare resources, or pursuing remote work opportunities, tech-savvyness opens doors to countless possibilities. Prof. Singh stressed the need for grassroots initiatives, workshops, and inclusive policies to bridge the digital divide. He shared inspiring examples of women entrepreneurs, educators, and social activists who harnessed digital tools to drive change.
